

2nd INTERNATIONAL CARP CONFERENCE

CARP WORLD IN ONE PLACE
12-13 SEPTEMBER 2013, WROCLAW, POLAND

Dear Mr, Mrs,

2nd International Carp Conference is an event of high importance in the EU aquaculture world. It will be held on 12-13th September 2013 in Wroclaw, Poland. Inland Fisheries Institute in Olsztyn together with Aller Aqua company, the organizers, have the honour to invite you to develop this unique meeting for the benefit of all carp farmers around Europe.

After the success of the First International Carp Conference in Kazimierz Dolny in 2011 we have decided to continue the positive dialogue between carp farmers all around Europe.

There are two thematic areas to be discussed during the Conference:

Strategy of carp farming in EU with all the constraints and good practices in different countries. We will define the barriers of freshwater farming development as well as positive ideas in that matter. During the Conference there will be announced the strategy of carp farming in EU – a document, which will be agreed by the representatives of carp producers from all EU countries.

European Maritime and Fisheries Fund 2014-2020. We will analyze the effects of European Fisheries Fund 2007-2013 on carp farms in terms of production and economy. It is a high time to discuss the guidelines for implementation of EMFF 2014-2020.

We highly count on your active participation in the 2nd International Carp Conference. It is crucial that the sector gets first hand information. It will directly influence the future of this sector.

We kindly ask you to inform all interested persons, institutions and organizations.

Persons responsible for the conference program are dr Andrzej Lirski (alirski@infish.com.pl) and Anna Pyć (anna@pstragpustelnia.pl, +48 668 815 097). All organization details are published on website: www.carpinternational.pl.

We believe that the second International Carp Conference, with your support, will become a success of the whole carp farming sector.

Kind regards,
Organizers
